

Going from 1 commit to  
2 commits

Create new branch called “crazyidea”

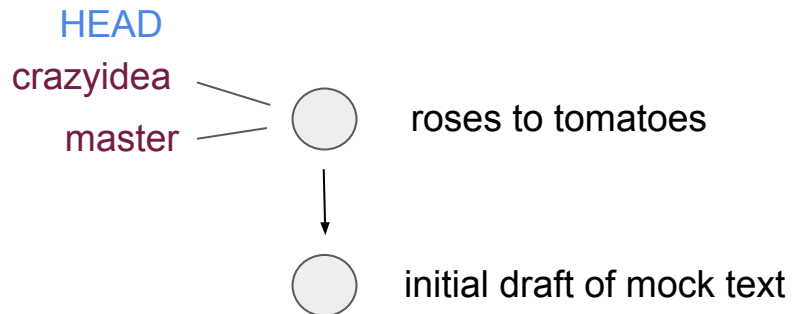

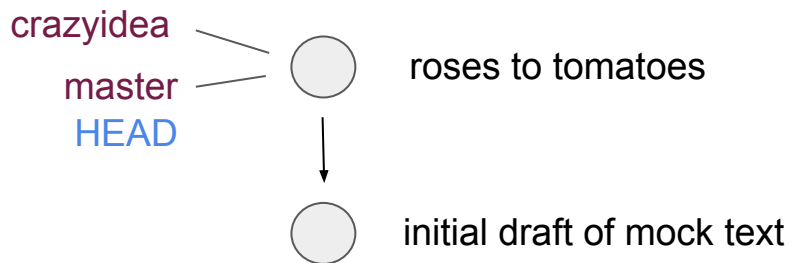

```
git branch crazyidea
```

Branches are pointers  
not folders

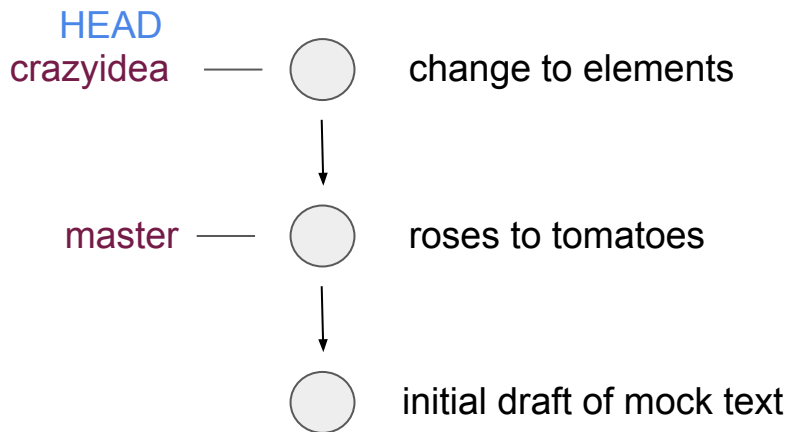

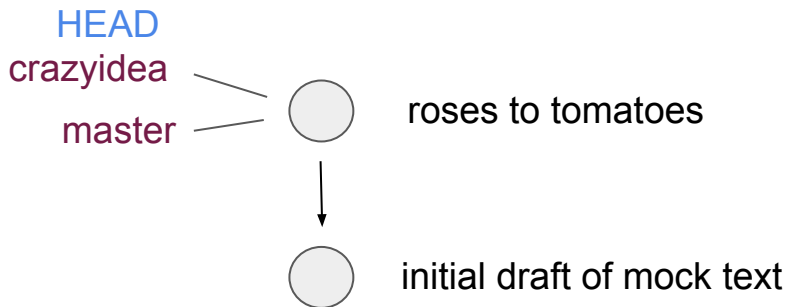

# Move the HEAD to “crazyidea”

```
git checkout crazyidea (OR)  
git switch crazyidea
```

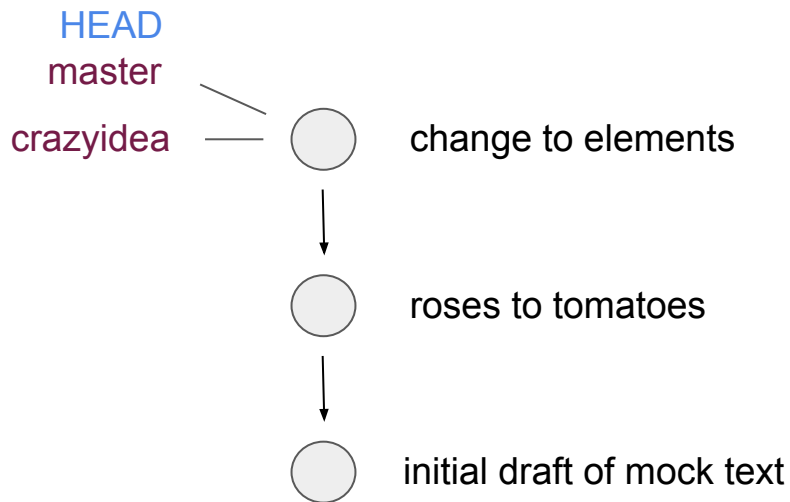

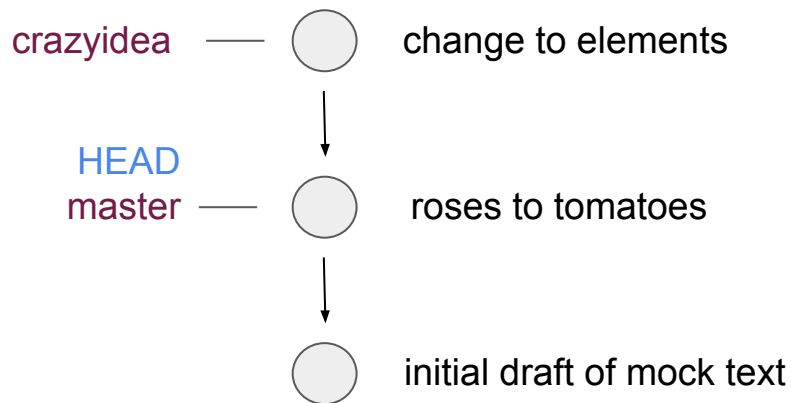

# Commit under “crazyidea”

git commit

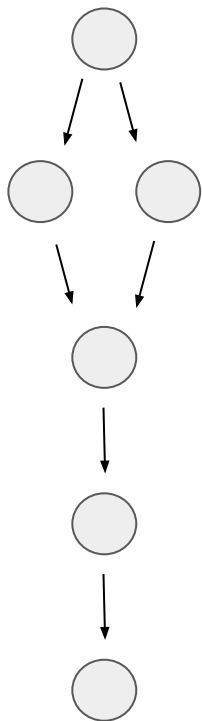

# Merge “crazyidea” back to “master”

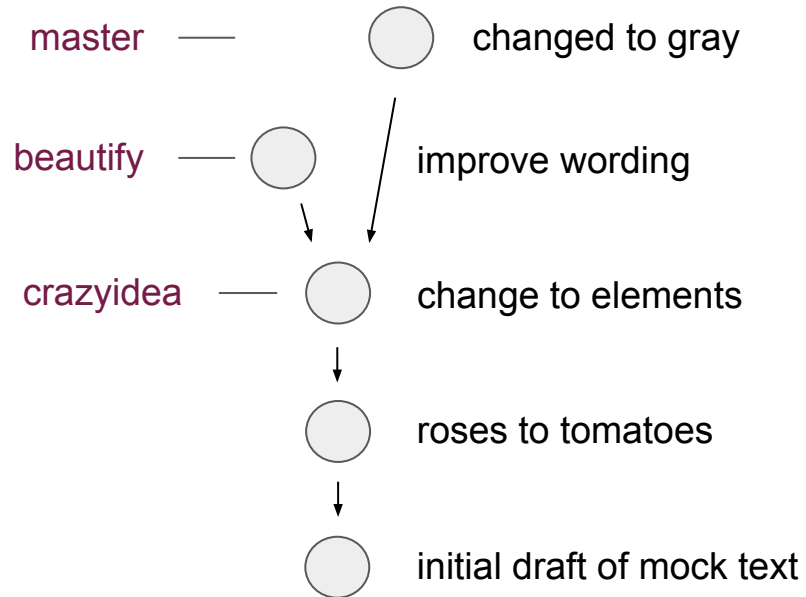

```
git switch master  
git merge crazyidea
```

# Merging after both branches having commits

# Merging after both branches having commits

# Merging after both branches having commits

```
git checkout master  
git merge beautify
```
